DATA

Financial Statement Data Sets

January 2009 - December 2025

The Financial Statement Data Sets below provide the numeric information from the face financials of all financial statements. This data is extracted from corporate financial reports filed with the Commission using eXtensible Business Reporting Language (XBRL). The Financial Statement Data Sets are more compact compared to other data sets that include additional disclosures.

The information is presented without change from the "as filed" financial reports submitted by each registrant. The data is presented in a flattened format to help users analyze and compare corporate disclosure information over time and across registrants. The data sets also contain additional fields including a company's Standard Industrial Classification to facilitate the data's use.

Data sets will be updated quarterly. Data contained in documents filed after the last business day of a quarter will be included in the subsequent quarterly posting.

The Financial Statements Data (/files/financial-statement-data-sets.pdf) (PDF, 305 KB) provides documentation of scope, organization, file formats and table definitions.

DISCLAIMER: The Financial Statement Data Sets contain information derived from structured data filed with the Commission by individual registrants as well as Commission-generated filing identifiers. Because the data sets are derived from information provided by individual registrants, we cannot guarantee the accuracy of the data sets. In addition, it is possible inaccuracies or other errors were introduced into the data sets during the process of extracting the data and compiling the data sets. Finally, the data sets do not reflect all available information, including certain metadata associated with Commission filings. The data sets are intended to assist the public in analyzing data contained in Commission filings; however, they are not a substitute for such filings. Investors should review the full Commission filings before making any investment decision.

Note:

- In December 2024, reprocessed Financial Statement Data Sets wer posted. The Financial Statements Data Sets were refreshed to only include the submissions and the numeric data from the primary financial statements as rendered by the Commission. Previously, the data sets were compiled to present only data that was applicable to entire filing entity (non-dimensional) or for a co-registrant. The reprocessed files used rendering data to determine which data poin were presented on the primary financial statements. Future data se will be processed in this manner. The layout and fields remain the sa apart from the NUM file where a new field 'segments' has been add The documentation file has been updated to reflect the changes an other clarification or corrections needed. The prior version of the financial statement data sets will be archived (/data-research/sec-mar -data/financial-statement-data-sets-archive) but will not be updated.
